PROFILE

Implement best practices in modern software engineering: design, implementation, documentation, deployment, monitoring, and operations. Solid knowledge of code assessment skills, and optimization techniques for creative solutions. Deliver well-architected software solutions that power ever-increasing demands of availability, reliability, security, performance.

SKILLS

- Programming Languages: JavaScript, Java, J2EE, HTML, CSS
- Technologies: ReactJS, UI/UX, NodeJS, React Native, React-Bootstrap, TailWind, MongoDB, MySQL, Git, GitHub
- IDEs: VS Code, Sublime Text, Eclipse
- Others: Redux, API, REST API, Bootstrap, JSON, React Hooks, CRUD, DNS server, Auth, Mongoose, Linux

CERTIFICATIONS

- Completed (JAVA, J2EE, SQL, Hibernate, Spring, Android & Web Technologies) Training from Jspiders BTM Bangalore.
- Java Programming - Great Learning Academy
- OOPs in Java - Great Learning Academy

EDUCATION

Visvesvaraya Technological University,
Karnataka **Aug 2017 - July 2021**
Bachelor of Engineering (civil)

PROFESSIONAL GOAL

SOFTWARE DEVELOPER

JSPIDERS

Jan 2022 - Present

- Designing, building, and maintaining the websites, using authoring and scripting languages, content creation tools, management tools.
- Involved in designing, coding user interfaces using ReactJs and Material UI.
- Developed all the middleware components, which consisted of all the business logic, using JavaScript framework ReactJS, Javascript, and AJAX.
- Performed object-oriented software development for creating various layers of business object layer, data access layer, business layer, and presentation layer of the application.
- Designed master-page and used themes, skin and sitemap to make consistent look throughout the website.
- Involved in the development of the web pages according to the specifications using HTML, XML, and CSS.
- Correcting the errors by making appropriate changes and rechecking the program to ensure that the desired results are produced.
- Reviewing and updating web page content and links in a timely manner, using appropriate tools.

PERSONAL PROJECTS

EasePortfolio

- Build highly-interactive applications using modern web technologies such as JavaScript, ReactJS, HTML, CSS.
- Developing and implementing highly-responsive user interface components using React concepts. Enhance rich data-driven web applications by consuming RESTful services & APIs.
- Monitoring and improving front-end performance. Building reusable components and front-end libraries.
- Optimizing components for high performance across a vast array of web-capable devices & browsers. Ensure cross-browser & device compatibility.
- Participate and perform code review that aligns with required standards of security, performance, and code quality. Work closely with the QA team.
- Play an active role in all aspects of defining the experience of a new application including identification of user needs, prototyping, iterative end-user validation, and testing/supporting produced code.
- Interpreting business requirements into effective UI and server-side specifications. Responsible for understanding functional and business requirements and translating them into effective code.
